S.N. 10/067,431

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I, Claims 16-20,24-28, drawn to a subassembly comprising a cathode, a plurality of cathode current collectors bonded to the cathode with an adhesive, an anode, a plurality of anode current collectors bonded to the anode with an adhesive and a separator.

II, Claims 21-23, drawn to a subassembly comprising a cathode, a plurality of cathode current collectors contacting the cathode, an anode, a plurality of anode current collectors contacting the anode and a separator providing for lateral fluid communication.

III, Claims 29-38, drawn to a subassembly comprising a cathode, a plurality of cathode current collectors contacting the cathode, an anode, a plurality of anode current collectors contacting the anode and a separator.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-15 are generic.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1745

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
